

July 27, 2010

Dear Tres,

I am writing to provide you with a written testimonial of my experience with the Performance Boat School (PBS) and the overall benefits that I feel are provided to Wake Zone clients.

I attended a morning session of a course offered by your school earlier this year. The classroom training broadened my knowledge about the safety and hazards of owning and operating high performance boats. We often recommend that our clients take your course for several reasons. From an insurance agent prospective, the course provides reassurance that the safety of the operators, passengers, vessels, and other boaters continues to be the top priority while on the water. While I did not attend the on-water portion of the course, I can say that our clients have found it to be extremely beneficial. They felt that it taught them to operate their boat in a manner that ensures the safety of all on board the vessel. Many of our clients, young and old, experienced and novice, have attended the Performance Boat School and have returned raving about the amount of knowledge and skills they had obtained by attending the course. I would highly recommend taking the Performance Boat School courses if you are a performance boat owner.

Sincerely,
