Tres & Brad

Sorry about getting this out so late, time just slipped by, I guess. The Ultra course at the Lake of the Ozarks last summer was fantastic; I would recommend it to all boaters not just performance boating. If you ever have one at the Ozarks again let me know, I would like to get my wife in it.

Now for the class critique, I did not find anything inaccurate or outdated in the course but since you guys know so much more than me I wouldn't have known anyway!

The areas of the course that seemed most helpful for me was "turning" the boat.

Thinking back I had no idea how to properly turn a boat at high speed, the give and take! I have had three years in my small cat but never turned it sharply at high speed, the "turning" was most helpful. Second was the "trim and drive setting" before the cat I had a twin V hull and I never used enough trim. Thirdly was the how "steps" work, that was very interesting.

I can't say you should delete anything from the course or add to the course. It was great! Additional comments or suggestions: There was so much in the course that I wanted to take in I had trouble trying to take notes and drawings and listen to you guys at the same time. It would be nice if some of your sketches could be in a hand out but I suppose there would be some kind of copy write stuff you would have to contend with.

Overall I thought the course was good and well worth the money and both you and Brad did a wonderful job teaching. Keep in touch and let me know if you plan on being back this year.

I want to thank Brad for all the help he provided me during the Shootout, the little cat wouldn't shift which made docking a real chore. Once on the course it ran great and 115 MPH was more than I expected and enough to win a class champion.

Hope to see you guys again.

Warren
