01/15/2007

Tres, just a quick note to thank you for the recent class I and my wife took at your performance boating school. I have been " boating " for over 40 years, and have over that time acquired a lot of experience both " hands on " as well as through " structured " courses offered by the Coast Guard, local Power Squadrons, etc. and your class rates as one of the best " investments " in time that I have ever made !

Through your combination of "classroom " instruction, followed by

the " hands on " application of the theory involved, you gave us not only an understanding of what is happening to our " go fast " boat but most importantly how to safely enjoy the experience. I have been using the techniques we were taught since returning from the class and I feel much more comfortable and secure going fast in my GoFast !

Thanks again,

Rich Breunich
