

Tres Martin Performance
9440 West Highway 326
Ocala Florida 34482

January 09/2006

My Daughter and I recently attended your class in November 2006. The Formula Fast Tec boat we purchased was our first high performance boat, although I've been boating for 35 years, my experience and the fact of never having an insurance claim, plus a clean driving record, made no difference to the insurance companies. The insurance company wanted our training in high performance boating to be complete.

The class was "eye opening." We feel confident in our ability to safely handle our boat. The respect for the danger of speed and what can happen on the water will never be forgotten. It's great to learn the about the dangers in the class room before they are experienced in real life conditions subjecting all on board to injury.

We thank the insurance companies for requiring this class, everyone driving a "go fast" boat should take this class and understand the principles Tres teaches.
