

As the Marine Director for Markel American Insurance Company and having spent 15 years in the Claim Department, I have seen many tragic losses that could have been prevented. We are very pleased that somebody has stepped forward and done something.

The course was very comprehensive. I really enjoyed learning what is happening under the boat, knowing how to communicate with your boat and all the other safety aspects - it will save lives!

After taking Tres course, I know that our insureds will be better boaters. We will continue to support your initiatives and provide incentive to take the course by providing a discount.

We at Markel American Insurance Company wish you the best in this endeavor!

Regards,

Thomas Conroy
