To Whom It May Concern:

I am writing this letter to express my happiness about taking the Tres Martin Performance Boat School. While I attended the school the most important piece of knowledge that I came away with was the ability to understand how a high performance boat operates. Not only that, the class taught me other useful things such as the differences between V-Hull and Cat Hull configurations.

Before I completed the class I had a hard-time dealing with many different aspects that need to be addressed when driving and owning any performance boat. Now I am comfortable with drive and trim settings, turning techniques, situational awareness, pre-flight checks, trailer-ing, docking, maneuvering and much more. I certainly feel comfortable now with any task that requires my attention with our boat.

Tres also spent hours on the water with me. I had only driven our DCB twice before this class. My husband gets to be the passenger more these days. This sport is not just for men, and that is why I encourage women to take this class. I learned so much!!! It was a great experience and I can not wait to meet with Tres and Brad again to show them how much of a better driver I am. It is so much fun to drive something with so much power and understand how it all works. I encourage every woman that drives any kind of boat to take this class. I came away with much more knowledge and confidence.

Sincerely,

Shellie Potter
